

EXHAUST GAS ANALYSER (EGA) – MOT ACCEPTED UNITS SINCE: 1.6.2003

With each Exhaust Gas Analyser there must be a copy of the GEA “Certificate of Acceptance” (provided by the equipment manufacturer/supplier) detailing make/model, serial number and the Testing Station details. Please note that the GEA has provided this information as a guide only, so always check with your EGA supplier before purchasing equipment. For details of suppliers of EGAs please return to our Home Page, select ‘Members Directory’ and click on Emission Equipment –Petrol.

Please Note:

- EGAs must include a database containing the latest “In Service Exhaust Emissions Standards for Road Vehicles” publication
- Equipment Identification Numbers were introduced in 2008.

CURRENT					
The equipment listed in this table is CURRENT which means that it meets DVSA specification and is supported by the equipment manufacturer; therefore, replacement MOT equipment or equipment purchased for new VTS applications should be selected from this list.
