

**WHEEL PLAY DETECTORS (WPD) – ACCEPTED UNITS FOR ATL & OPTL MOT TEST LANES**

With each set of Wheel Play Detectors there must be a copy of the GEA “Certificate of Acceptance” (provided by the equipment manufacturer/supplier) detailing make/model, serial number and the VTS details. Please note that the GEA has provided this information as a guide only, so always check with your supplier before purchasing equipment. For details of suppliers of WPDs please return to our Home Page, select ‘Members Directory’ and click on “MOT Bays”.

The following WPD’s are acceptable for use in Vehicle Testing Stations (VTSs) operating Automated and One-Person Test Lanes.

The equipment listed in this table is <b>CURRENT</b> which means that it meets DVSA specification and is supported by the equipment manufacturer; therefore, replacement equipment or equipment purchased for new VTS applications should be selected from this list.

**OBSOLETE**

The equipment listed in the table below is **OBSOLETE** which means that it may no longer meet the DVSA specification and may no longer be supported by the equipment manufacturer. Providing that this equipment is in good working order, is calibrated and meets the latest software requirements, it can continue to be used.
